The screenshot displays the Malwarebytes Premium software interface. At the top left, the logo 'Malwarebytes | PREMIUM' is visible, and at the top right, there is a 'My Account' button. A dark sidebar on the left contains navigation options: 'Dashboard', 'Scan' (highlighted in green), 'Quarantine', 'Reports', and 'Settings'. The main content area is titled 'Select a Scan Method' and features three columns of scan options:

✓ Threat Scan	Custom Scan	Hyper Scan
<p>Our most comprehensive scan. It scans all the places malware is known to hide, including Memory, Startup, Registry, and Filesystem Objects. Recommended as your daily scan.</p>	<p>Allows you to scan where and what you want to scan. Modifications include choosing which Objects to scan (Memory, Startup and Registry). Enables you to customize the treatment of Potentially Unwanted Programs (PUPs) and Modifications (PUMs).</p>	<p>Quickly checks Memory and Startup Objects for active malware threats. If anything is found, we recommend running a Threat Scan afterward for more comprehensive detection.</p>

At the bottom of the interface, there is a 'Recommended' label under the Threat Scan column and a 'Start Scan' button. A watermark 'OceanofDMG' is visible at the bottom of the screenshot.

Don't be surprised if certain items aren't selected by default – these are typically legitimate files (like browser preferences) that have been modified by the infection.. Like the free PC version, this initial release offers no real-time protection It's a simple scan and remove tool, designed to detect various forms of Mac malware and then purge it.. Whether or not you have – or even need – anti-virus software installed on your Mac for day-to-day protection, it still pays to be able to occasionally scan for malware – including less virulent forms such as adware, browser hijackers and potentially unwanted programs.
